### Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

**Toll-free access** is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres:

Newfoundland & Labrador	Zenith 07037
Nova Scotia, New Brunswick & Prince Edward Island	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
British Columbia (South & Central)	112-800-663-1551
Yukon & Northern B.C. (area served by NorthwTel Inc.)	Zenith 08913
Northwest Territories	Zenith 22015

### How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

### Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinarolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

Un **service d'appel sans frais** est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres de référence régionaux:

Terre-Neuve et Labrador	Zénith 07037
Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
Colombie-Britannique (région sud et centrale)	112-800-663-1551
Yukon et le nord de la Colombie-Britannique (région desservie par NorthwTel Inc.)	Zénith 08913
Territoires du Nord-Ouest	Zénith 22015

### Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

## INTRODUCTION

This report provides the final statistics from the 1981 Census on selected characteristics for the universes of population, occupied private dwellings, private households and census families in private households. It would be indicated in the Table of Contents, if the data are not presented for certain subprovincial geographic levels where those do not exist in the province or territory shown (such as Census Metropolitan Areas in the Yukon and Northwest Territories).

Population characteristics are presented in Tables 1 to 11, covering various cross-classifications of age, sex and marital status. Information on occupied private dwellings, found in Tables 12 to 18, involves characteristics such as tenure, structural type, number of persons per household, and type of household in various combinations. Users should note that the count of occupied collective dwellings in Table 13 includes those occupied by usual residents and those occupied solely by foreign and/or temporary residents, whereas the count of persons in occupied collective dwellings refers to usual residents only. Also, as there is a one-to-one correspondence between private households and occupied private dwellings, these two counts are the same.

Tables 19 to 28 concern private households, presenting various relationships between number of persons, composition and size, type and persons per household.

Selected characteristics for the universe of census families in private households will be found in Tables 29 through 39. Tables 29 to 31 present data on families by number of persons, average number of persons in families and basic family status (family and non-family persons). Tables 32 to 37 provide statistics on census family composition. In Tables 32, 33 and 34, census families are classified in terms of whether or not children are present at home. The reader should note that in certain other published tables (Bulletins 92-935, 93-937 to 93-948 and 95-941 to 95-981), 1981 fertility data are combined with census family structure in order to further classify husband-wife census families with no children at home into families with children no longer at home and childless families (those families where the wife has reported that no children were ever born to her). Census families with children at home are classified by the number of children at home. The average number of children per family is also

## INTRODUCTION

Ce bulletin présente les statistiques définitives du recensement de 1981 pour certaines caractéristiques des univers de la population, des logements privés occupés, des ménages privés et des familles de recensement dans les ménages privés. Si c'était le cas, la table des matières indiquerait que des données ne figurent pas pour quelques régions géographiques infraprovinciales lorsque celles-ci n'existent pas dans la province ou le territoire mentionné (notamment, il n'y a pas de régions métropolitaines de recensement au Yukon et dans les Territoires du Nord-Ouest).

Les caractéristiques de la population paraissent aux tableaux 1 à 11, avec divers recoupements selon l'âge, le sexe et l'état matrimonial. Les données sur les logements privés occupés présentées dans les tableaux 12 à 18 portent sur des caractéristiques telles que le mode d'occupation, le type de construction, le nombre de personnes par ménage et le genre de ménage selon diverses combinaisons de variables. Les utilisateurs devront bien noter que les statistiques sur les logements collectifs occupés présentées au tableau 13 englobent ceux qui sont occupés par des résidents habituels et ceux qui sont occupés uniquement par des résidents étrangers et/ou temporaires, tandis que les statistiques sur les personnes vivant dans les logements collectifs occupés touchent seulement les résidents habituels. En outre, étant donné la relation d'univocité entre les ménages privés et les logements privés occupés, ces deux chiffres sont donc identiques.

Les tableaux 19 à 28 sur les ménages privés indiquent diverses relations entre le nombre de personnes, la composition et la taille du ménage, le genre et le nombre de personnes par ménage.

On trouvera dans les tableaux 29 à 39 certaines caractéristiques de l'univers des familles de recensement dans les ménages privés. Les tableaux 29 à 31 présentent les données sur les familles selon le nombre de personnes, le nombre moyen de personnes par famille, ainsi que des données sur la situation des particuliers dans la famille de recensement (personnes faisant partie d'une famille et personnes hors famille). Les tableaux 32 à 37 font état des statistiques sur la composition de la famille de recensement. Dans les tableaux 32, 33 et 34, les familles de recensement sont classées selon la présence ou l'absence d'enfants à la maison. Le lecteur constatera que dans certains autres tableaux publiés (bulletins 92-935, 93-937 à 93-948 et 95-941 à 95-981), les données de 1981 sur la fécondité sont associées aux données sur la structure de la famille de recensement afin de mieux distinguer chez les familles époux-épouse sans enfants présents à la maison, celles dont les enfants ont quitté la maison et celles qui n'ont jamais eu d'enfants (c'est-à-dire les familles où l'épouse a déclaré n'avoir jamais mis d'enfants au monde). Les familles de

provided, along with the total number of children at home and those who are 24 years of age and under. In Tables 35, 36 and 37, census families with children at home are classified in terms of the age groups of children at home.

Tables 38 and 39 contain statistics on census family structure, census family type and census family household composition. The reader should note that primary families, i.e., those maintaining their own household, are broken down into husband-wife and lone-parent families, and further classified into those living with additional persons or living without additional persons in the same household. In the case of census family structure, lone-parent families are not broken down by sex of parent.

## DEFINITIONS

**Age.** Refers to age at last birthday (as of the census reference date, June 3, 1981). This variable is derived from date of birth.

**Date of Birth.** Refers to the day, month and year of birth, collected for the purpose of determining the person's age as of the census reference date. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

**Marital Status.** Refers to the following conjugal status of a person:

Now married (excluding separated) -  
Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married";

Separated -  
Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce;

Divorced -  
Persons who have obtained a legal divorce and who have not remarried;

Widowed -  
Persons who have lost their spouse through death and who have not remarried;

Never married (single) -  
Persons who never married (including all persons less than 15 years) and persons whose marriage was annulled.

**Sex.** Refers to the gender of the respondent.

**Dwelling.** Refers to a set of living quarters in which a person or group of persons resides or could reside.

recensement dont les enfants vivent à la maison sont classées selon le nombre d'enfants à la maison. On donne aussi le nombre moyen d'enfants par famille de même que le nombre total d'enfants vivant à la maison et d'enfants âgés de 24 ans ou moins. Dans les tableaux 35, 36 et 37, les familles de recensement avec enfants à la maison sont classées en fonction du groupe d'âge de ces derniers.

Les tableaux 38 et 39 présentent des statistiques sur la structure et le genre de famille de recensement ainsi que la composition du ménage avec famille de recensement. Le lecteur remarquera que les familles principales, c'est-à-dire celles qui assurent le soutien de leur ménage, sont ventilées en familles époux-épouse et en familles monoparentales puis subdivisées à nouveau selon que d'autres personnes vivent ou non avec elles dans le même ménage. Dans le cas de la structure de la famille de recensement, on notera que les familles monoparentales ne sont pas ventilées selon le sexe du parent.

## DÉFINITIONS

**Âge.** Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1981). Cette variable est établie d'après la réponse à la question sur la date de naissance.

**Date de naissance.** Jour, mois et année de naissance aux fins d'établissement de l'âge du recensé au jour du recensement. Les personnes qui ne connaissent pas la date exacte de leur naissance devaient donner la meilleure estimation possible.

**État matrimonial.** Situation conjugale d'une personne, notamment:

Actuellement marié(e) (sauf séparé(e)):  
personne dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé; les personnes vivant en union consensuelle sont considérées comme actuellement mariées.

Séparé(e):  
personne qui a été abandonnée, ou qui est séparée de son conjoint, légalement ou non, parce qu'elle ne veut plus vivre avec cette personne, mais qui n'a pas obtenu de divorce.

Divorcé(e):  
personne qui a obtenu un divorce et qui ne s'est pas remariée.

Veuf(ve):  
personne dont le conjoint est décédé et qui ne s'est pas remariée.

Célibataire (jamais marié(e)):  
personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans), ou personne dont le mariage a été annulé.

**Sexe.** Qualité d'homme ou de femme.

**Logement.** Ensemble de pièces d'habitation qu'une personne ou un groupe de personnes habitent ou pourraient habiter.

## DEFINITIONS - Continued

**Private Dwelling.** Refers to a structurally separate set of living quarters with a private entrance from outside or from a common hall, lobby, vestibule or stairway inside the building. The entrance to the dwelling must be one that can be used without passing through the living quarters of someone else. The census classifies private dwellings into REGULAR PRIVATE DWELLINGS and SEASONAL/MARGINAL DWELLINGS. Regular private dwellings are further classified into three major groups: OCCUPIED DWELLINGS (occupied by usual residents), UNOCCUPIED DWELLINGS, and DWELLINGS OCCUPIED BY FOREIGN AND/OR TEMPORARY RESIDENTS. Seasonal/marginal dwellings are classified as occupied by usual residents or by foreign and/or temporary residents. Unoccupied seasonal/marginal dwellings are not counted in the housing stock.

**Occupied Private Dwelling.** Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. Unless otherwise specified, all data in housing reports are for occupied private dwellings rather than unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents.

**Regular Dwelling.** Refers to a private dwelling which was built or converted for year-round (permanent) occupancy. These dwellings are classified into OCCUPIED DWELLINGS, UNOCCUPIED DWELLINGS and DWELLINGS OCCUPIED BY FOREIGN AND/OR TEMPORARY RESIDENTS.

**Seasonal/Marginal Dwelling.** Refers to a private dwelling which is unsuitable for year-round (permanent) occupancy; that is, it does not appear to have sufficient facilities to provide comfortable accommodation throughout the year (e.g., non-winterized cottages or cabins). Also included is any other dwelling that was not built or converted for year-round or permanent occupancy (e.g., unconverted barns or garages).

**Private Dwelling Occupied by Foreign and/or Temporary Residents.** Refers to a private dwelling solely occupied by foreign and/or temporary residents on Census Day. A TEMPORARY RESIDENT of a dwelling is a person who resides there on Census Day, but has a usual place of residence elsewhere in Canada. A FOREIGN RESIDENT is a person whose usual place of residence is outside Canada. These dwellings are classified into REGULAR DWELLINGS and SEASONAL/MARGINAL DWELLINGS.

## DÉFINITIONS - suite

**Logement privé.** Ensemble structurellement distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor ou un escalier commun à l'intérieur, c'est-à-dire que l'entrée doit donner accès au logement sans qu'on ait à passer par les pièces d'habitation de quelqu'un d'autre. Aux fins du recensement, on classe les logements privés en LOGEMENTS PRIVÉS ORDINAIRES et en LOGEMENTS SAISONNIERS/MARGINAUX. Les logements privés ordinaires se subdivisent en trois grandes catégories: les LOGEMENTS OCCUPÉS (par les résidents habituels), les LOGEMENTS INOCCUPÉS et les LOGEMENTS OCCUPÉS PAR DES RÉSIDENTS ÉTRANGERS ET (OU) TEMPORAIRES. Les logements saisonniers/marginaux sont classés comme logements occupés par les résidents habituels ou comme logements occupés par des résidents étrangers et (ou) temporaires. Les logements saisonniers/marginaux inoccupés ne font pas partie du stock immobilier.

**Logement privé occupé.** Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement. Sauf indication contraire, toutes les données présentées dans les publications sur le logement se rapportent aux logements privés occupés et non à des logements privés inoccupés ou à des logements occupés par des résidents étrangers et (ou) temporaires.

**Logement ordinaire.** Logement privé construit ou transformé pour être habité à l'année ou en permanence. Ces logements sont classés comme LOGEMENTS OCCUPÉS, LOGEMENTS INOCCUPÉS et LOGEMENTS OCCUPÉS PAR DES RÉSIDENTS ÉTRANGERS ET (OU) TEMPORAIRES.

**Logement saisonnier/marginal.** Logement privé qui ne peut être habité à l'année ou en permanence, c'est-à-dire que les installations nécessaires au confort durant toute l'année sont insuffisantes (par ex., les chalets d'été, les pavillons non hivernisés). Cette catégorie comprend aussi tout logement qui n'a pas été construit ou transformé pour être habité à l'année ou en permanence (par ex., les granges ou garages non transformés en habitations).

**Logement privé occupé par des résidents étrangers et (ou) temporaires.** Logement privé occupé uniquement par des résidents étrangers et (ou) temporaires le jour du recensement. Le RÉSIDENT TEMPORAIRE d'un logement est une personne qui habitait ce logement le jour du recensement, mais dont le domicile habituel se trouve ailleurs au Canada. Un RÉSIDENT ÉTRANGER est une personne dont le domicile habituel est à l'extérieur du Canada. Ces logements sont classés comme LOGEMENTS ORDINAIRES et comme LOGEMENTS SAISONNIERS/MARGINAUX.

## DEFINITIONS - Continued

**Collective Dwelling.** Refers to a dwelling of a commercial, institutional or communal nature. It may be identified by a sign on the premises or by a Census Representative speaking with the person in charge or with a resident or a neighbour, etc. Included are hotels, motels, tourist homes, nursing homes, hospitals, staff residences, communal quarters of military camps, work camps, jails, missions, rooming- or lodging-houses, and so on. Collective dwellings may be occupied by usual residents or solely by foreign and/or temporary residents.

**Structural Type.** Refers to the structural arrangements of the dwelling.

### Single House (or Single Detached)

Refers to a single dwelling not attached to any other building and surrounded on all sides by open space.

### Semi-detached or Double House

Refers to one of two dwellings attached side by side but not attached to any other building and surrounded on all other sides by open space.

### Duplex

Refers to one of two dwellings, one above the other, not attached to any other building and surrounded on all sides by open space.

### Row House

Refers to one of three or more dwellings joined side by side but not having any other dwellings either above or below.

### Apartment in a Building That Has Five or More Storeys

Refers to a dwelling unit in a high-rise apartment building.

### Apartment in a Building That Has Less Than Five Storeys

Refers to a dwelling unit in a triplex, quadruplex or a dwelling unit in a non-residential building or in a house that has been converted.

### House Attached to a Non-residential Building

Refers to a single dwelling attached at ground level to another building (such as a store, etc.) but separated from it by a common wall running from ground to roof.

## DÉFINITIONS - suite

**Logement collectif.** Institution ou établissement commercial ou communautaire qui s'affiche comme tel ou que le recenseur peut identifier comme tel en s'adressant à la personne qui en a la charge, à un résident, à un voisin, etc. Sont inclus dans cette catégorie les hôtels, les motels, les maisons de chambres pour touristes, les maisons de repos, les hôpitaux, les résidences de personnel, les casernes de camps militaires, les camps de chantier, les prisons, les centres d'accueil, les pensions et maisons de chambres, etc. Il peut s'agir d'un logement occupé par des résidents habituels ou uniquement par des résidents étrangers et (ou) temporaires.

**Type de construction.** Type de construction du logement.

### Maison individuelle (ou logement individuel non attenant)

Logement individuel non attenant à une autre construction et entouré d'espaces libres.

### Maison jumelée ou maison double

Deux logements côte à côte réunis par un mur commun, mais non attenants à une autre construction, et entourés d'espaces libres.

### Duplex

Deux logements superposés non attenants à une autre construction et entourés d'espaces libres.

### Maison en rangée

Logement dans une rangée d'au moins trois logements réunis côte à côte sans autre logement au-dessus ou en dessous.

### Appartement dans un immeuble de cinq étages et plus

Logement dans une tour d'habitation.

### Appartement dans un immeuble de moins de cinq étages

Logement dans un triplex ou un quadruplex, dans une construction non résidentielle ou dans une maison qui a été transformée.

### Maison attenante à une construction non résidentielle

Logement individuel attenant au niveau du sol à une autre construction, par ex., un magasin, mais qui en est séparé par un mur commun s'élevant du sol au toit.

## DEFINITIONS - Continued

Mobile Home

Refers to a dwelling which has been designed and constructed to be transported on its own chassis and capable of being moved on short notice.

Other Movable Dwelling

Refers to a dwelling such as a tent, travel trailer, railroad car or houseboat.

**Tenure.** Refers to whether some member of the household owns or rents the dwelling.

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

A dwelling is classified as "rented" even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative. For census purposes, in a co-operative all members jointly own the co-operative and occupy their dwelling units under a lease agreement.

**Private Household.** Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

**Household Type.** Refers to the basic division of private households into FAMILY and NON-FAMILY HOUSEHOLDS. FAMILY HOUSEHOLD refers to a household that contains at least one census family (e.g., persons living in the same dwelling who have a husband-wife or parent-never-married child relationship). ONE-FAMILY HOUSEHOLD refers to a single census family that occupies one private dwelling. The family may be that of the household reference person or one living as a related, lodging or other type of family with a household reference person who is a non-family person. A MULTIPLE-FAMILY HOUSEHOLD is one in which two or more census families occupy the same private dwelling. One family may be that of the household reference person, or the household reference person may be a non-family person with whom two or more census families are residing.

NON-FAMILY HOUSEHOLD refers to one person who lives alone in a private dwelling, or to a group of persons who occupy a private dwelling and do not constitute a census family.

## DÉFINITIONS - suite

Habitation mobile

Logement conçu et construit pour être transporté sur son propre châssis et qu'on peut déplacer sans grand délai.

Autre logement mobile

Logement tel qu'une tente, une roulotte de voyage, une voiture de chemin de fer ou un bateau-maison.

**Mode d'occupation.** Indique si le logement est possédé ou loué par un membre du ménage.

Un logement est classé "possédé" même s'il est hypothéqué ou grevé d'une autre créance. Le logement peut être situé sur un terrain donné ou pris en location, ou encore faire partie d'un condominium enregistré ou non.

Un logement est classé "loué" même s'il est donné en location sans loyer en argent ou à un loyer réduit, ou qu'il fait partie d'une coopérative. Aux fins du recensement, tous les membres d'une coopérative ont des parts dans cette coopérative et occupent leur logement en vertu d'un bail.

**Ménage privé.** La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

**Genre de ménage.** Répartition fondamentale des ménages privés en MÉNAGES FAMILIAUX et en MÉNAGES NON FAMILIAUX. Un MÉNAGE FAMILIAL est un ménage qui comprend au moins une famille de recensement, par exemple des personnes qui habitent le même logement et qui ont des liens conjugaux (époux-épouse) ou des liens de filiation (parent et enfant jamais marié). Un MÉNAGE UNIFAMILIAL se compose d'une seule famille de recensement qui occupe un logement privé. Il peut s'agir de la famille de la personne repère du ménage ou d'une famille apparentée, d'une famille chambreuse ou de tout autre genre de famille vivant avec une personne repère hors famille. Un MÉNAGE MULTIFAMILIAL se compose de deux familles de recensement ou plus qui occupent le même logement privé. Une de ces familles peut être celle de la personne repère du ménage ou il peut s'agir d'une personne repère hors famille vivant avec deux familles de recensement ou plus.

Un MÉNAGE NON FAMILIAL est constitué d'une personne qui vit seule dans un logement privé ou d'un groupe de personnes qui partagent un seul logement privé, mais ne forment pas une famille de recensement.

## DEFINITIONS - Continued

**Household Composition.** Refers to the division of private households into FAMILY HOUSEHOLDS and NON-FAMILY HOUSEHOLDS. FAMILY HOUSEHOLD refers to a household that contains at least one census family (e.g., persons living in the same dwelling who have a husband-wife or parent-never-married child relationship).

FAMILY HOUSEHOLDS are divided into family households without additional persons and family households with additional persons.

NON-FAMILY HOUSEHOLD refers to one person who lives alone in a private dwelling, or to a group of persons who occupy a private dwelling and do not constitute a census family.

**Household Size.** Refers to the number of persons in a PRIVATE HOUSEHOLD.

**Census Family.** Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables.

**Census Family Composition.** Refers to the classification of census families in terms of the number and/or age groups of children at home.

**Census Family Household Composition.** Refers to the classification of census families in terms of the presence and number of "additional persons" in the household.

Additional persons refers to any household members who are not members of the census family being considered. These additional persons may be either members of another census family, or non-family persons.

**Census Family Status.** Refers to the classification of the population into family and non-family persons.

Family persons refers to household members who belong to a census family. They, in turn, are further classified as follows:

The terms Husband and Wife refer to persons living in the same dwelling as their spouse. Persons living common-law are considered, for census purposes, as now married, regardless of their legal marital status, and accordingly appear as husband-wife family in the relevant tables.

Lone Parent refers to a mother or a father, with no spouse present, living in a dwelling with one or more never-married children.

## DÉFINITIONS - suite

**Composition du ménage.** Répartition des ménages privés en MÉNAGES FAMILIAUX et en MÉNAGES NON FAMILIAUX. Un MÉNAGE FAMILIAL est un ménage qui comprend au moins une famille de recensement, par exemple des personnes qui habitent le même logement et qui ont des liens conjugaux (époux-épouse) ou des liens de filiation (parent et enfant jamais marié).

Les MÉNAGES FAMILIAUX sont classés en ménages familiaux sans autres personnes et en ménages familiaux avec d'autres personnes.

Un MÉNAGE NON FAMILIAL est composé d'une personne qui vit seule dans un logement privé ou d'un groupe de personnes qui partagent un seul logement privé, mais ne forment pas une famille de recensement.

**Taille de ménage.** Nombre de personnes dans un MÉNAGE PRIVÉ.

**Famille de recensement.** Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur âge) ou un parent seul (peu importe son état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal; elles figurent donc comme une famille époux-épouse dans les tableaux sur la famille de recensement.

**Composition de la famille de recensement.** Les familles de recensement sont classées selon le nombre et (ou) le groupe d'âge des enfants à la maison.

**Composition du ménage avec famille de recensement.** Les familles de recensement sont classées selon le nombre d'"autres personnes" dans le ménage.

L'expression autres personnes désigne les membres du ménage qui ne font pas partie de la famille de recensement prise en considération. Il peut s'agir de membres d'une autre famille de recensement ou de personnes hors famille.

**Situation des particuliers dans la famille de recensement.** Catégorisation de la population en personnes faisant partie d'une famille et en personnes hors famille.

Personnes faisant partie d'une famille - Membres d'un ménage qui font partie d'une famille de recensement. Ces personnes sont classées comme suit:

Époux ou épouse - Personne qui habite le même logement que son conjoint. Les personnes vivant en union libre sont considérées, aux fins du recensement, comme actuellement mariées, quel que soit leur état matrimonial légal, et figurent donc comme des familles époux-épouse dans les tableaux.

Parent seul - Mère ou père, sans conjoint, qui habite un logement avec un ou plusieurs enfants célibataires (jamais mariés).

## DEFINITIONS - Continued

Child refers to sons and daughters (including adopted and stepchildren) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever been married, regardless of their marital status at enumeration, are not considered as members of their parents' family, even though they are living in the same dwelling.

Non-family persons refers to household members who do not belong to a census family. They may be related to the household reference person - Person 1 - (e.g., brother-in-law, cousin, grandparent) or unrelated (e.g., lodger, room-mate, employee). A person living alone is always a non-family person.

**Census Family Structure.** Refers to the classification of census families into husband-wife families (with or without children present) and lone-parent families by sex of parent.

**Census Family Type.** Refers to the classification of census family in terms of whether or not they maintain their own household (i.e., whether the person responsible for household payments - rent, or mortgage, or taxes, or electricity, etc. - is a member of a census family).

Primary family refers to the census family in which a person responsible for household payments is a member. It is therefore a maintaining family.

Secondary family refers to any census family in which a person responsible for household payments is not a member. They are therefore not maintaining families.

If the person identified as responsible for the household payments is a non-family person, or resides elsewhere, no primary family will exist in the household regardless of whether Person 1 is a census family member. Accordingly, any census family in such a household will be classified as a secondary family.

In 1981, the criterion for determining family type was changed. A new question was added to the census questionnaire to determine a person responsible for paying the rent, or mortgage, or taxes, or electricity, and is used to identify primary and secondary families.

In previous censuses, the primary family was defined as the family of the head of the household. While we anticipate that in the majority of cases the person responsible for household payments will also be considered as the household reference person (Person 1), this will not always be the case.

## DÉFINITIONS - suite

Enfant - Fils et filles (y compris les enfants adoptés et les enfants d'un autre lit) qui ne se sont jamais mariés, peu importe leur âge, et qui vivent dans le même logement que leurs parents. Les fils et les filles qui se sont déjà mariés, peu importe leur état matrimonial au moment du recensement, ne sont pas considérés comme des membres de la famille de leurs parents, même s'ils vivent dans le même logement.

Personnes hors famille - Membres d'un ménage qui ne font pas partie d'une famille de recensement. Ils peuvent être apparentés à la personne repère du ménage, la Personne 1 (par ex., beau-frère, cousine ou grand-père) ou non apparentés (par ex., chambreur, compagne d'appartement ou employé). Les personnes qui vivent seules sont toujours considérées comme des personnes hors famille.

**Structure de la famille de recensement.** Catégorisation des familles de recensement en familles époux-épouse (avec ou sans enfants présents) et en familles monoparentales selon le sexe du parent.

**Genre de famille de recensement.** Les familles de recensement sont classées selon qu'elles soutiennent ou non leur propre ménage, c'est-à-dire que la personne qui est responsable du paiement du loyer ou de l'hypothèque, ou des taxes, ou de l'électricité, etc., fait partie ou non d'une famille de recensement.

Famille principale - Famille de recensement dont fait partie la personne responsable des paiements du ménage. Il s'agit alors d'une famille qui assure le soutien de son propre ménage.

Famille secondaire - Famille de recensement dont la personne responsable des paiements du ménage ne fait pas partie. Il s'agit alors d'une famille qui n'assure pas le soutien de son propre ménage.

Si la personne déclarée comme responsable des paiements du ménage est une personne hors famille ou habite ailleurs, il n'y a pas de famille principale dans le ménage, même si la Personne 1 fait partie d'une famille de recensement. Par conséquent, toute famille de recensement dans un tel ménage est considérée comme une famille de recensement secondaire.

Le critère utilisé pour déterminer le genre de famille a été modifié en 1981. Une nouvelle question dans le questionnaire permet de connaître la personne responsable du paiement du loyer, ou de l'hypothèque, ou des taxes, ou de l'électricité, etc., et sert à déterminer les familles principales et secondaires.

Dans les recensements antérieurs, la famille principale était celle du chef de ménage. Quoique, dans la majorité des cas, la personne responsable des paiements du ménage sera probablement la personne repère du ménage (Personne 1), ce ne sera pas toujours le cas.

## DEFINITIONS - Continued

**Census Division (CD).** Refers to the general term applying to counties, regional districts, regional municipalities and five other types of geographic areas made up of groups of census subdivisions. In Newfoundland, Manitoba, Saskatchewan and Alberta, the term describes areas that have been created by Statistics Canada in cooperation with the provinces as an equivalent for counties.

**Census Subdivision (CSD).** Refers to the general term applying to municipalities, Indian Reserves, Indian Settlements and unorganized territories.

In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in cooperation with the provinces as an equivalent for municipalities.

**Census Subdivision Type.** Census subdivisions are classified into various types, according to official designations adopted by provincial or federal authorities. With the exception of unorganized territories and Indian Reserves, the type indicates the municipal status of a CSD. The following list indicates the abbreviations used for the most common CSD types:

BOR	Borough
C	City - Cité
CM	County (Municipality)
COM	Community
CT	Canton (Municipalité de)
CU	Cantons unis (Municipalité de)
DM	District (Municipality)
HAM	Hamlet
ID	Improvement District
LGD	Local Government District
LID	Local Improvement District
LOT	Township and Royalty
MC	Municipal Corporation
MD	Municipal District
PAR	Parish
P	Paroisse (Municipalité de)
R	Indian Reserve - Réserve indienne
RM	Rural Municipality
RV	Resort Village
SA	Special Area
SCM	Subdivision of County Municipality
SD	Sans désignation (Municipalité)
S-E	Indian Settlement - Établissement indien
SET	Settlement
SRD	Subdivision of Regional District
SUN	Subdivision of Unorganized
SV	Summer Village
T	Town
TP	Township
UNO	Unorganized - Non organisé
V	Ville
VL	Village

## DÉFINITIONS - suite

**Division de recensement (DR).** Terme générique qui désigne les comtés, les districts régionaux, les municipalités régionales et cinq autres types de régions géographiques formées de groupes de subdivisions de recensement. À Terre-Neuve, au Manitoba, en Saskatchewan et en Alberta, l'expression désigne les unités créées comme équivalents des comtés et délimitées par Statistique Canada en collaboration avec les provinces.

**Subdivision de recensement (SDR).** Terme générique qui désigne les municipalités, les réserves indiennes, les établissements indiens et les territoires non organisés.

À Terre-Neuve, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également des unités géostatistiques créées comme équivalents des municipalités et délimitées par Statistique Canada en collaboration avec les provinces.

**Catégorie de subdivision de recensement.** Les subdivisions de recensement sont classées en diverses catégories selon les appellations adoptées par les autorités provinciales ou fédérales. À l'exception des territoires non organisés et des réserves indiennes, la catégorie indique le statut d'une subdivision de recensement. Voici la liste des abréviations des catégories de subdivision de recensement les plus courantes:

## DEFINITIONS - Continued

**Municipality.** Refers to an area with corporate status governed by Provincial and Territorial Acts. These acts differ from province to province. Moreover, municipalities within each province vary in name, status, and administrative powers.

**Indian Reserve.** Refers to territory, mostly rural and varying in size, that belongs to an Indian tribe according to treaties between the Federal Government and the Indians. It is excluded from local jurisdiction and administered by the Federal Department of Indian Affairs and Northern Development.

**Unorganized Territory.** Refers to an area without municipal organization, directly administered by the province or, when applicable, by the county. Such areas are generally characterized by low population density.

**Census Metropolitan Area (CMA).** Refers to the main labour market area of an urbanized core (or continuously built-up area) having 100,000 or more population. CMAs are created by Statistics Canada and are usually known by the name of the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CMAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

Since a CMA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particularly large areas of land. Census metropolitan areas may also differ from Metropolitan Areas designated by local authorities for planning or other purposes.

**Census Agglomeration (CA).** Refers to the main labour market area of an urbanized core (or continuously built-up area) having between 10,000 and 99,999 population. CAs are created by Statistics Canada and are usually known by the name of the urban area forming their urbanized core. They contain whole municipalities (or census subdivisions). CAs are comprised of (1) municipalities completely or partly inside the urbanized core; and (2) other municipalities if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

## DÉFINITIONS - suite

**Municipalité.** Territoire constitué en corporation, régi par des lois provinciales et territoriales. Les lois diffèrent d'une province à une autre. De plus, dans chaque province, les municipalités ont des appellations, des statuts et des pouvoirs administratifs différents.

**Réserve indienne.** Territoire, le plus souvent rural et de taille variable, qui appartient à une tribu indienne en vertu de traités conclus entre le gouvernement fédéral et les Indiens. Elle échappe à la compétence des autorités locales et est administrée par le ministère des Affaires indiennes et du Nord.

**Territoire non organisé.** Région sans organisation municipale, administrée directement par la province ou, selon le cas, par le comté. Ces régions sont généralement caractérisées par la faible densité de leur population.

**Région métropolitaine de recensement (RMR).** Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant 100,000 habitants ou plus. Les RMR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la région urbaine qui forme leur noyau urbanisé. Elles renferment des municipalités (ou subdivisions de recensement) entières. Une RMR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités si a) au moins 40 % de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou si b) au moins 25 % de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

Puisqu'une RMR doit renfermer des subdivisions de recensement entières, ses limites peuvent se trouver dans le secteur réel du marché du travail, ou s'étendre en dehors de celui-ci. Les différences peuvent être importantes dans les régions du Canada où les subdivisions de recensement ont une très grande superficie. Il est également possible que des régions métropolitaines de recensement ne concordent pas avec les régions métropolitaines désignées par les autorités locales à des fins de planification ou autres.

**Agglomération de recensement (AR).** Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant entre 10,000 et 99,999 habitants. Les AR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la région urbaine qui forme leur noyau urbanisé. Elles renferment des municipalités (ou subdivisions de recensement) entières. Une AR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités si a) au moins 40 % de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou si b) au moins 25 % de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

## DEFINITIONS - Concluded

Since a CA must contain whole census subdivisions, its limits may fall within, or extend beyond, the actual labour market area. The differences may be significant in those parts of Canada where census subdivisions cover particularly large areas of land.

**Component.** Refers to the municipality or census subdivision building block of a census metropolitan area or a census agglomeration.

**CMA/CA Part.** Census metropolitan areas (CMAs) and census agglomerations (CAs) are divided into three parts: urbanized core, urban fringe and rural fringe. The parts are always made up of complete enumeration areas, but often comprise only parts of municipalities (or census subdivisions). Not all three parts will necessarily be found in each CMA or CA.

**Urbanized core:** Continuous built-up area around which a CMA or a CA is delineated. To be considered as continuous, the built-up area must not have a discontinuity exceeding two kilometres. Usually its name is used as the name of the CMA or CA.

**Fringe:** Parts of a CMA or a CA outside the urbanized core. The fringe consists of urban parts and rural parts.

## CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly.

## DÉFINITIONS - fin

Puisqu'une AR doit renfermer des subdivisions de recensement entières, ses limites peuvent se trouver dans le secteur réel du marché du travail, ou s'étendre en dehors de celui-ci. Les différences peuvent être importantes dans les régions du Canada où les subdivisions de recensement ont une très grande superficie.

**Composante.** Municipalité ou subdivision de recensement qui constitue l'unité de base d'une région métropolitaine de recensement ou d'une agglomération de recensement.

**Partie de RMR/AR.** Les régions métropolitaines de recensement (RMR) et les agglomérations de recensement (AR) se divisent en trois parties: noyau urbanisé, banlieue urbaine et banlieue rurale. Les parties sont toujours formées de secteurs de dénombrement entiers, mais ne comprennent souvent que des parties de municipalités (ou subdivisions de recensement). Les trois parties ne se retrouvent pas toutes nécessairement dans chaque RMR ou AR.

**Noyau urbanisé:** zone bâtie en continu autour de laquelle une RMR ou une AR est délimitée. Pour être considérée comme continue, une zone bâtie ne doit pas comporter d'espaces libres de plus de deux kilomètres. Son nom sert habituellement de nom à la RMR ou à l'AR.

**Banlieue:** partie d'une RMR ou d'une AR située en dehors du noyau urbanisé. La banlieue est formée de parties urbaines et de parties rurales.

## CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un arrondissement aléatoire qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme de pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total des éléments. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. Les renvois au bas des tableaux avertissent l'utilisateur en conséquence.

## SAMPLING

The 1981 Census data were collected either on a 100% basis (i.e. from all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 100% basis. All table headings are noted accordingly.

## DATA QUALITY

### Introduction

Any census data will be subject to error. Some of the errors will tend to cancel out over a large number of cases (i.e. for larger cells) as errors will be made in both directions (i.e. random errors). In general the proportion or rate of these random errors increases as the population or cell size decreases. Thus, small data values, even though collected on a 100% basis, should be used with some caution.

Other of the errors will tend not to cancel out as errors will have a tendency to occur in one direction more than another (systematic errors, for example, question wording which invites errors in one direction more than in the other) and will result in a bias.

The data contained in this bulletin are subject to coverage errors, response errors and to processing errors.

### Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population for persons and 2% for households. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1971 Census.

A comparable study was undertaken for the 1981 Census but the results were not available at the time this report was published.

## ÉCHANTILLONNAGE

Les données du recensement de 1981 ont été recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis selon la première méthode. Tous les titres des tableaux ont été annotés en conséquence.

## QUALITÉ DES DONNÉES

### Introduction

Dans tout recensement, les données recueillies peuvent être entachées d'erreurs. Certaines de ces erreurs tendent à s'annuler à mesure que le nombre de cas observés augmente (c'est-à-dire dans le cas des classes plus importantes) puisque les erreurs se font dans les deux sens (erreurs aléatoires). De façon générale, la proportion ou le taux d'erreurs aléatoires augmente au fur et à mesure que la taille de la population ou de la classe diminue. Aussi, faut-il utiliser avec une certaine réserve les petits chiffres obtenus, même si ces données ont été recueillies auprès de l'ensemble de la population.

Dans d'autres cas, les erreurs ne s'annulent pas parce qu'elles ont tendance à se produire dans un sens plutôt que dans un autre. Il s'agit d'erreurs systématiques. Par exemple, le libellé d'une question peut favoriser les erreurs dans un sens particulier. Ces erreurs entraînent un biais.

Des erreurs d'observation, des erreurs de réponse et des erreurs de traitement ont pu influencer sur la qualité des données fournies dans le présent bulletin.

### Erreur d'observation

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le compte plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

On a entrepris une étude spéciale sur le recensement de 1976 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de 2 % de l'ensemble de la population dans le cas des particuliers et de 2 % pour les ménages. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1971.

Une étude similaire a été entreprise pour le recensement de 1981, mais les résultats n'étaient pas accessibles au moment de la parution du présent bulletin.

## Response Error

A response error occurs when the response recorded is incorrect. Such errors may occur due to the respondent misinterpreting the question, inadvertently checking the wrong box, or even consciously checking the wrong box. Contributing to this error may be the questionnaire wording or organization, or the training and attitude of enumerators.

## Processing Error

Processing errors can occur when write-in answers are coded, when responses on the questionnaire are transcribed to be read by the computer, and when imputations are done either for non-response or for edit rejects.

A comprehensive assessment of the quality of the census data collected on a 100% basis will be included in Data Quality - Total Population (Catalogue No. 99-904).

## SPECIAL NOTES

### Structural Type Data

Users are advised that comparisons of structural type data with previous censuses should be approached with caution. Also, due to response bias in classifying certain structural types in the 1981 Census, the data for Single attached (semi-detached or double, row house, house attached to a non-residential building), Apartment less than 5 storeys, and Duplex should be used as one aggregate type, namely, Other Multiple Dwellings, as presented in the table(s) in this bulletin. More information concerning the nature of the problem and the conditions under which the data may be used with more confidence will be contained in Data Quality - Total Population (Catalogue No. 99-904).

### Type of Household Data

Due to a change in the method of determining Family Type, implemented for the 1981 Census, caution should be used in comparing the distribution of primary and secondary families with data from previous censuses. Since the delineation of Type of Household is dependent upon Family Type, the same caution should be exercised in comparing the 1981 data for secondary family households with the corresponding figures in previous censuses.

An explanation of these changes, and if applicable, the impact of such changes on the data for household type in general, will be included in the Summary Guide - Total Population (Catalogue No. 99-902).

## Erreur de réponse

Une erreur de réponse se produit lorsque la réponse enregistrée est incorrecte. De telles erreurs surviennent lorsque le répondant a mal interprété la question ou a coché la mauvaise case par inadvertance ou même volontairement. La formulation des questions ou le mode de présentation du questionnaire ainsi que la formation et l'attitude des agents recenseurs sont des facteurs qui peuvent favoriser ce genre d'erreurs.

## Erreur de traitement

Des erreurs de traitement peuvent se produire lorsque des réponses en toutes lettres sont codées, lorsque les réponses du questionnaire sont transcrites en langage d'ordinateur et lorsqu'on fait des imputations pour tenir compte soit de la non-réponse soit des rejets au contrôle.

Une évaluation détaillée de la qualité des données du recensement recueillies sur une base intégrale sera présentée dans la publication Qualité des données - Population totale (n° 99-904 au catalogue).

## NOTES SPÉCIALES

### Données sur le type de construction

Les usagers devront user de prudence lorsqu'ils compareront les données sur le type de construction avec celles des recensements précédents. En outre, par suite du biais de réponse dans la classification de certains types de construction au recensement de 1981, les données sur les logements individuels attenants (maisons jumelées ou doubles, maisons en rangée, maisons attenantes à une construction non résidentielle), les appartements dans un immeuble de moins de 5 étages et les duplex doivent être considérés comme appartenant à un seul groupe c'est-à-dire autres logements multiples, comme on le présente dans le(s) tableau(x) de ce bulletin. Pour plus de renseignements sur la nature de ce problème et sur la façon d'utiliser les données, prière de consulter la publication Qualité des données - Population totale (n° 99-904 au catalogue).

### Données sur le genre de ménage

À cause d'un changement introduit en 1981 dans la façon de déterminer le genre de famille, nous recommandons aux utilisateurs de se montrer prudents lorsqu'ils comparent les données relatives aux familles principales et secondaires à celles des recensements antérieurs. Puisque le genre de ménage découle, en partie, du genre de famille, les mêmes précautions devraient être prises en comparant les données de 1981 sur les ménages de famille secondaire.

On peut trouver, une explication de ces changements et, selon le cas, de l'impact de ces derniers sur les données relatives au genre de ménage en général, dans la publication Guide sommaire - Population totale (n° 99-902 au catalogue).

## Census Family Type Data

Due to improvements in the method of determining Census Family Type implemented for the 1981 Census (see definition above), caution should be used in comparing the distribution of primary and secondary families with data from previous censuses. For example, census families in private households where the person responsible for household payments is residing elsewhere are automatically classified as secondary families in 1981. In previous censuses, first, the identification of these cases was not possible and second, some of these families were classified as primary families.

Further explanation of these changes is included in the Summary Guide - Total Population (Catalogue No. 99-902).

## REFERENCE PRODUCTS

The 1981 Census Dictionary (Catalogue No. 99-901) contains the complete range of definitions for all variables and terms used in the 1981 Census data products. Of general interest would be information contained in Summary Guide - Total Population (Catalogue No. 99-902) and Summary Guide - Sample Population (Catalogue No. 99-903) which include lists and indexes of tables appearing in the data publications, as well as reproductions of the census questionnaire forms and basic indicators of data quality. Further details on the data quality may be obtained from Data Quality - Total Population (Catalogue No. 99-904) and Data Quality - Sample Population (Catalogue No. 99-905).

A wide range of other analytical and reference products are available and described, along with information on data products and available services, in Products and Services of the 1981 Census of Canada.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

## Données sur le genre de famille de recensement

Comme la façon de déterminer le genre de famille de recensement a été améliorée lors du recensement de 1981 (voir la définition ci-dessus), nous conseillons aux utilisateurs d'être prudents lorsqu'ils comparent les données sur la répartition des familles principales et des familles secondaires à celles des recensements antérieurs. Par exemple, sont automatiquement classées comme familles secondaires en 1981 les familles de recensement dans les ménages privés où la personne responsable des paiements du ménage habite ailleurs. Aux recensements précédents, premièrement, il n'était pas possible d'identifier ces cas et deuxièmement, certaines de ces familles étaient classées comme familles principales.

On trouvera de plus amples renseignements dans le Guide sommaire - Population totale (n° 99-902 au catalogue).

## PRODUITS DE RÉFÉRENCE

Le Dictionnaire du recensement de 1981 (n° 99-901 au catalogue) donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1981. Les renseignements que renferment le Guide sommaire - Population totale (n° 99-902 au catalogue) et le Guide sommaire - Population-échantillon (n° 99-903 au catalogue), présentent un intérêt général puisqu'ils donnent la liste et l'index de tous les tableaux des publications ainsi qu'une reproduction des questionnaires du recensement et les indicateurs de base de la qualité des données. On peut obtenir plus de détails sur la qualité des données dans Qualité des données - Population totale (n° 99-904 au catalogue) et Qualité des données - Population-échantillon (n° 99-905 au catalogue).

La publication Produits et services du recensement du Canada de 1981 décrit une foule d'autres analyses et de produits de référence, et fournit des renseignements sur les produits et services disponibles.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.

NOTE: THE SUM OF THE PERSONS IN OCCUPIED PRIVATE DWELLINGS AND THE PERSONS IN OCCUPIED COLLECTIVE DWELLINGS WILL NOT EQUAL THE TOTAL POPULATION DUE TO THE EXCLUSION OF TEMPORARY RESIDENTS AND OF PERSONS IN HOUSEHOLDS OUTSIDE CANADA. - NOTA: LE TOTAL DES PERSONNES DANS LES LOGEMENTS PRIVES OCCUPES ET DES PERSONNES DANS LES LOGEMENTS COLLECTIFS OCCUPES DIFFERE DU TOTAL DE LA POPULATION A CAUSE DE L'EXCLUSION DES RESIDENTS TEMPORAIRES ET DES PERSONNES DANS LES MENAGES A L'EXTERIEUR DU CANADA.

(1) FIGURES ARE NOT COMPARABLE TO TABLE 2, CAT. NO. 93-801, 1976 CENSUS, DUE TO THE EXCLUSION IN 1981 OF UNOCCUPIED PRIVATE DWELLINGS.

- LES CHIFFRES NE PEUVENT ETRE COMPARES A CEUX DU TABLEAU 2 DU N° 93-801 AU CATALOGUE, RECENSEMENT DE 1976, PAR SUITE DE L'EXCLUSION, EN 1981, DES LOGEMENTS PRIVES INOCCUPES.

(2) INCLUDES COLLECTIVE DWELLINGS OCCUPIED BY USUAL RESIDENTS AND COLLECTIVE DWELLINGS OCCUPIED SOLELY BY FOREIGN AND (OR) TEMPORARY RESIDENTS. - COMPREND LES LOGEMENTS COLLECTIFS OCCUPES PAR DES RESIDENTS HABITUELS ET LES LOGEMENTS COLLECTIFS OCCUPES UNIQUEMENT PAR DES RESIDENTS ETRANGERS ET (OU) TEMPORAIRES.

(3) REFERS TO THE COUNT OF USUAL RESIDENTS ONLY. - LES CHIFFRES REPRESENTENT LES RESIDENTS HABITUELS SEULEMENT.
